◀ Chip configuration

Mechanical Chip Knife “Gold Holder”

Features

- 13.375" overall length. Can be configured to take chip cuts between 1/4" (.250") – 7/8" (.875") in size within a single knife holder.
- **Dual function knife holder** — can be utilized as a single cut (chop) knife holder with the removal of the chip spacer.
- Solid steel construction of both the knife holder body and front plate. “Gold” coated to resist corrosion and rust.
- Mounts with standard 5/8" – 9/32" torx screws.
- Utilizes inexpensive replacement knives.

Advantages

- Fast make-ready — mount only one knife holder, instead of two, when taking chips.
- Provides for rapid changeover of replacement cutting blades without removing the holder from the knife cylinder.
- Allows for both single cut (chop) and double cut (chip) knifing configurations.
- Provides huge savings in annual knifing costs and reduced make-ready / downtime.

For use with

- For use with WPM, or other manufacture, 5/8" undercut honeycomb knife cylinders with circumferences from 35.500" – 49.606". **Please specify circumference of rotary cutter when ordering.**
- Inline rotary cutters.
